O & M of Onsite and Decentralized Wastewater Systems (MI)

ABOUT THIS TRAINING WORKSHOP

Decentralized wastewater systems serve approximately 60 million people nationwide, making them a critical pillar of public infrastructure. However, environmental officials estimate that up to 25% of these systems are currently failing, threatening groundwater resources. Managing these systems requires unique vigilance to protect environmental and public health. This webinar delivers the vital strategies needed to proactively manage, inspect, and maintain these systems.

REGISTRATION & EVENT DETAILS

Event Dates: December 15-16, 2026
Event Time: 1:00PM-3:30PM (ET) - Each Day
Event Cost: FREE
